allertaLOM: Civil Protection mobile app

Real – time alerts

allertaLOM:

- allows users to receive **Civil Protection alerts** issued by the Functional Centre for Natural Risks Monitoring of Regione Lombardia, regarding potential natural events that could cause damage in the areas of interest.
- updates **local administrations, operators and citizens** on the **alert status** of the areas they are concerned with.
- **enhances accessibility and understanding** of technical information.
- **provides a dynamic map-based** visualization of forecasts.
- **displays the temporal evolution** of ground effects.

allertaLOM: Civil Protection alert system

Alert and emergencies in a snapshot

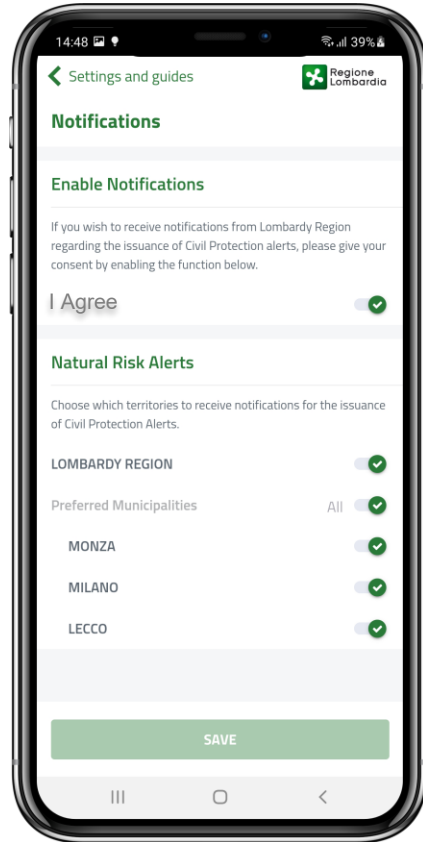

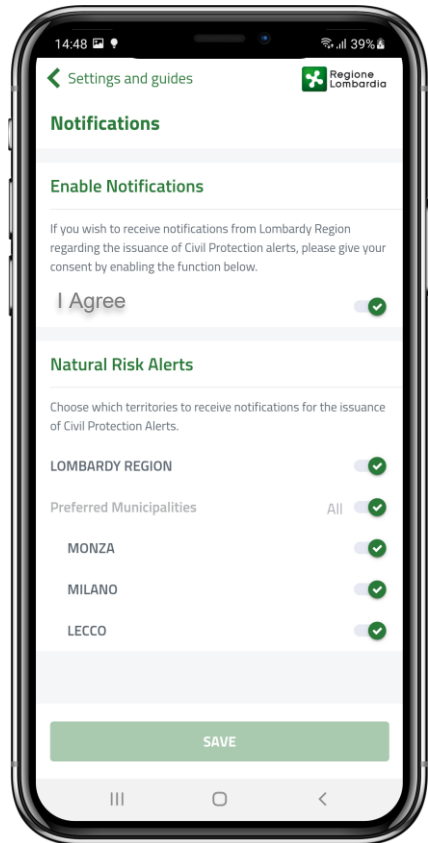

The app allows users to:

- **check the situation** in the preferred municipalities or across the entire region.
- **track the evolution** of alert levels on a map over 36 hours and share updates with contacts via social media, messaging apps or email.
- **customize notification preferences for alerts** issued in the selected municipalities.
- **download and consult** alert documents.

Push notifications

Activate notifications to always be up-to-date

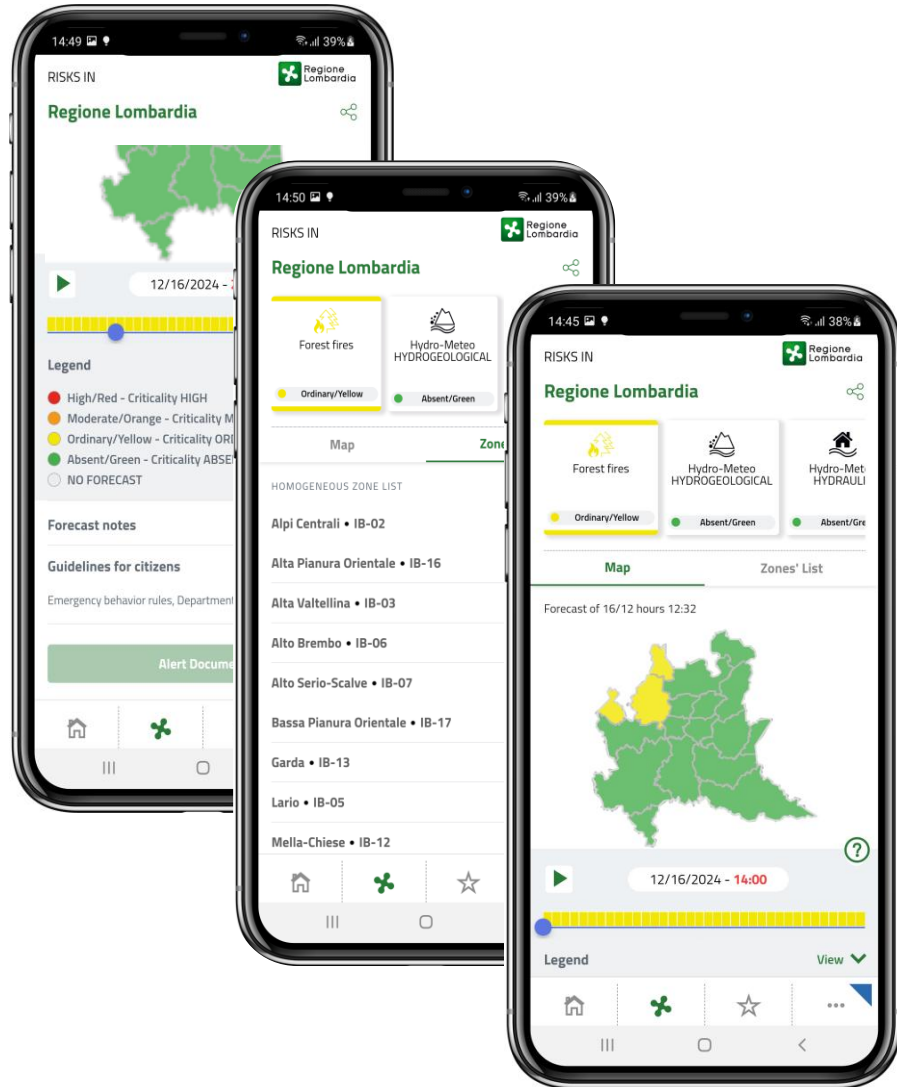

Receiving alert notifications for areas of interest

Users can choose **specific areas** for which they wish to **receive notifications** in case of an alert.

Browsing

Main page: risks, critical issues map, timeline

The situation map in Lombardy

Clicking on the "rosa camuna" icon in the lower-left corner, allows the user to view the **regional map**, divided into alert zones where alerts for the selected risks are active, displayed in colors corresponding to the color code. The situation can also be viewed in **table** format by clicking on the "Zones' List" tab.

Below the map, a **timeline bar** enables users to observe the progression of alerts across the territory. Any notes on the current forecast for the displayed risk can be found in the "Guidelines for operators."

Citizens can access information on **self-protection measures to adopt in emergencies**, as provided by the Civil Protection Department.

Finally, the **alert document can be downloaded** in PDF format.

Browsing

Favorite municipalities: risks, critical issues map, timeline

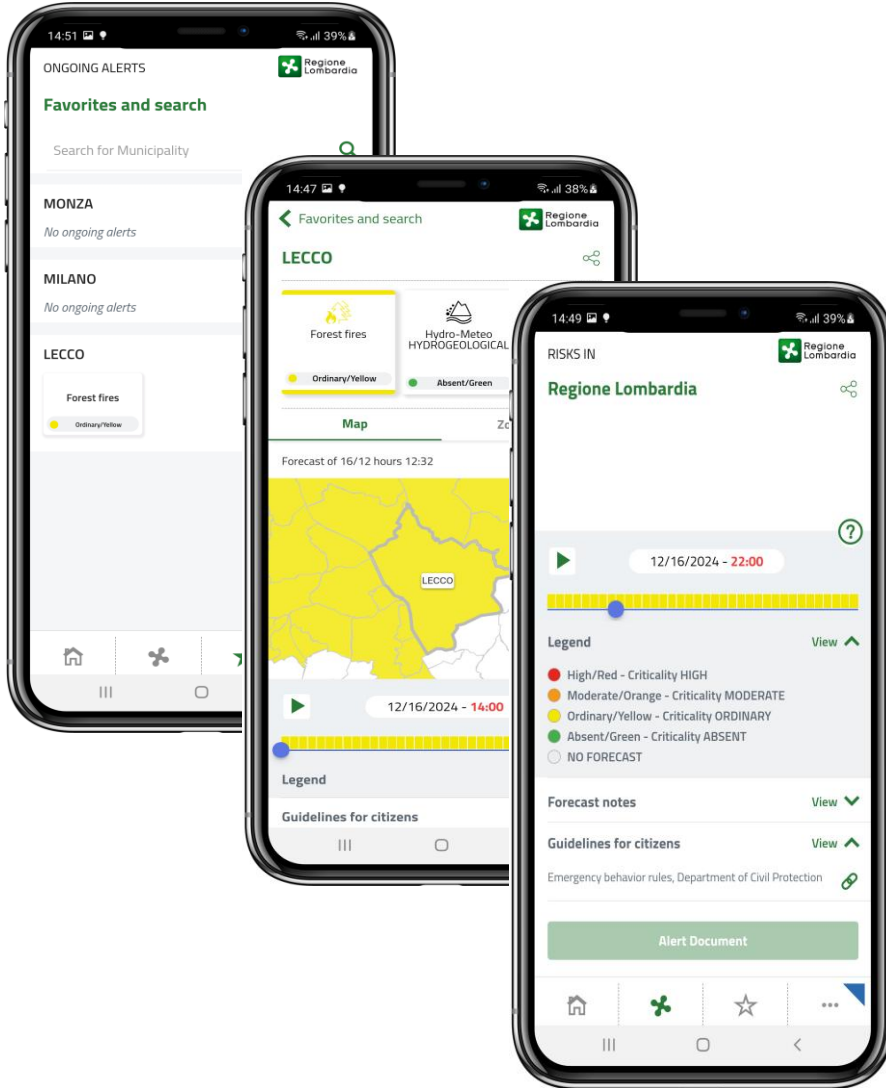

Checking previsions and alerts on favorite Municipalities

By clicking on the star icon, users can view **favorite Municipalities** and the risks for which an alert has been issued. Updates are indicated by a small blue triangle. Clicking on a risk provides access to the **municipality's map** and the **timeline bar**, showing the evolution of the situation. The map is displayed in the color corresponding to the alert code.

Below the map, **operators** can find guidance on the **operational phases** to be implemented locally to mitigate the effects of the events.

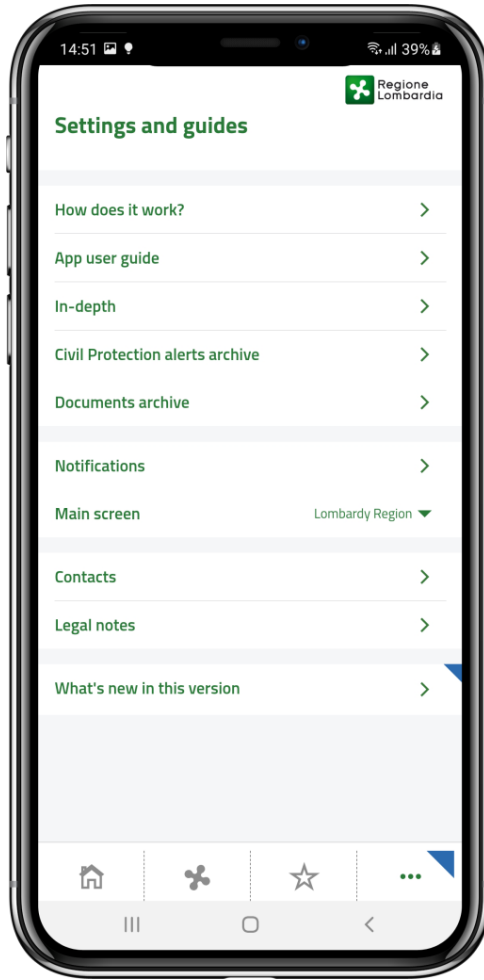

Citizens can access information on **self-protection measures** to adopt in case of emergencies, provided by the Civil Protection Department.

Finally, the **alert document can be downloaded** in PDF format.
